

Please have a heart when considering any modification that relaxes the current NJ Do Not Call regulation. My time with my family is limited in the evening as it is without the additional distraction and interruption of an unsolicited telephone call. When the phone rings, I'd like it to be a friend or family member. With aging parents and distant siblings, I want to know when the phone rings it's for a purpose other than a marketing ploy. Thank you in advance for your consideration and leaving the current policy in place. Now let's work on junk mail so we can reduce the size of landfills.
